Following complaints about the 2021 election’s Class President voting procedure, the following changes will be made for all following elections.

1) All elections using rank choice voting or IRV must have the option to abstain from ranking each individual slate, allowing voters to rank only certain slates if they want to
2) All elections involving slates must have the name of the slate along with the name of each member in parenthesis behind the slate name on the ballot
3) The exact voting mechanisms and tabulation procedures for each election shall be publicized each year alongside all other relevant election information

Edwin Ong
ASSU Elections Commissioner
